

Open Position: Working student/part-time position for front-end development/ UX design (8-16h/week)

About the Company:

Exnaton is a startup based in Zurich, Switzerland, which offers software for building local peer-to-peer energy communities for renewable energy. Our software empowers energy providers to set up energy communities in their distribution areas. Community members can directly buy renewable energy from their neighbors, which makes investing in the energy transition simple and fun! Our software computes smart real-time prices for locally produced energy which make renewable energy financially more attractive. End-users receive an app that maps the sources of their energy, making their electricity consumption more understandable. Visit www.exnaton.com for more information.

Your Role

We are looking for a motivated student to expand our team. You help us shape the user experience of our product, making renewable energy more attractive to its users. Among others, your main responsibilities in this role are the following:

- Contribute to a state-of-the-art web application
- Create understandable visualization of highly granular time-series energy data
- Design new functionalities in our web application
- Collaborate closely with our developer team to implement an exceptional design and user experience

Your Qualifications

We define ourselves by a culture of collaboration and ownership. We're looking for a driven, capable, and thoughtful person to add to our mission. The main qualifications we expect you to have are the following:

- Interest in UX design/front end development/product design
- Interest in sustainability, renewable energy, basic understanding of energy systems
- Pragmatic mindset, make quick decisions, and clearly prioritize on what moves the needle
- Experience in data visualization, ideally also time-series data (HighCharts, D3, etc.)
- First experience in reactive front end development (VueJS, React, JavaScript) or UX design, having built beautiful web applications in the past
- Fluent in English and/or German
- Share our mission for sustainability and own what you do

What We Offer

Our hierarchy is flat and communication is direct, which means that we operate and learn fast, as a team. At Exnaton, you can expect the following:

- Competitive salary
- Virtual office and flexible working hours as we believe in ownership and trust
- Having true impact in shaping an innovative tech product from its very early phases
- Potential to grow into a long-term agreement/full-time position with Exnaton
- Direct collaboration with the founder team

Please submit your application to info@exnaton.com.

We are an equal-opportunity employer and are dedicated to foster diversity. We strongly encourage individuals from groups traditionally underrepresented in tech to apply and intend to consider all applications equally regardless of ethnicity, ancestry, religion, national origin, sexual orientation, age, citizenship, marital status, disability, or gender identity.
